

**Prozesssicherheit durch tangentielle Einbaulage der Wendeschneidplatten**  
Process safety by tangential mounting of the inserts

**Schnitttiefe bis zu 10 mm**  
Depth of cut up to 10 mm

**Kosteneinsparung durch Taktzeitverkürzung**  
Cost savings through cycle time reduction

**Direkt gepresste WSP mit 8 effektiven Schneiden**  
Press-to-size-insert with 8 effective cutting edges

Das tangentielle Wendeplattenfrässystem MultiEdge T90 PRO8 ist für Schrupp- und Semischlichtoperationen in Stahl und Guss entwickelt.

The MultiEdge T90 PRO8 as modular milling systems with tangential inserts is designed for roughing and semi finishing operations in steel and cast iron.

Das Programm umfasst Trägerkörper im Durchmesserbereich von 50 bis 160 mm und Wendeschneidplatten mit Schnitttiefen bis zu 10 mm für die Bearbeitung von Stahl (ISO-P Werkstoffe) und Guss (ISO-K Werkstoffe).

The program covers cutter bodies in the diameter range from 50 to 160 mm and indexable inserts with cutting depths up to 10 mm for the machining of steel (ISO P materials) and cast iron (ISO K materials).

**MultiEdge T90 PRO8**  
**Eckfräser – Aufsteckausführung**  
**Shoulder milling cutter – arbor type**

Fräsen mit Wendeschneidplatten  
Milling with indexable inserts

### XNMU

### Spanformstufen Chip-breakers:

-ER

### Merkmale:

- Weichschneidende Wendeschneidplatten-Geometrie zur Reduzierung der Zerspankräfte
- 8-schneidige tangentielle Wendeschneidplatte für hohe Wirtschaftlichkeit
- Zustelltiefen bis  $a_{p \max} = 10 \text{ mm}$

### Features:

- Soft-cutting indexable insert geometry to reduce cutting forces
- Tangential insert with 8 cutting edges for high efficiency
- Depth of cut up to  $a_{p \max} = 10 \text{ mm}$

**Prozesssicherheit durch tangentielle  
Einbaulage der Wendeschneidplatten**  
Process safety by tangential  
mounting of the inserts

**Schnitttiefe bis zu 11,5 mm**  
Depth of cut up to 11,5 mm

**Kosteneinsparung durch lange stabile Pro-  
zesse**  
Cost savings through long and stable pro-  
cesses

**Direkt gepresste WSP mit 4 effektiven  
Schneide** Press-to-size insert with 4 effective  
cutting edges

Das tangentielle Wendeschneidplattenfrässystem MultiEdge T90 PRO4 ist für Schrupp- und Semischlichtoperationen in Stahl und Guss entwickelt.

The MultiEdge T90 PRO4 as modular milling systems with tangential inserts is designed for roughing and semi finishing operations in steel and cast iron.

Das Programm umfasst Trägerkörper im Durchmesserbereich von 50 bis 160 mm und Wendeschneidplatten mit Schnitttiefen bis zu 11,5 mm für die Bearbeitung von Stahl (ISO-P Werkstoffe) und Guss (ISO-K Werkstoffe).

The program covers cutter bodies in the diameter range from 50 to 160 mm and indexable inserts with cutting depths up to 11.5 mm for the machining of steel (ISO P materials) and cast iron (ISO K materials).

Fräsen mit Wendeschneidplatten  
Milling with indexable inserts

### LNMU

#### Spanformstufen Chip-breakers:

-SR

#### Merkmale:

- Stabile Wendeschneidplatten-Geometrie für ein breites Anwendungsspektrum
- 4-schneidige tangentielle Wendeschneidplatte für stabile Prozesse
- Zustelltiefen bis  $a_{p \max} = 11,5 \text{ mm}$

#### Features:

- Robust insert geometry for a broad area of application
- Tangential insert with 4 cutting edges for high efficiency
- Depth of cut up to  $a_{p \max} = 11.5 \text{ mm}$
